

WHY CLOUDLANES FOR FAST CLOUD BACKUP AND ARCHIVE?

As companies accelerate to the cloud, existing cloud strategies, vendor lock-in, and manual processes are impediments to this initiative. CloudLanes has introduced a software platform designed to help companies to responsibly move data from on-premises to any cloud—as well as between clouds—and use software from any cloud to light up this data. With the CloudLanes Cloud Data Platform, you get:

FASTER SPEED TO THE CLOUD

Send data to the cloud at a ***much faster rate***. Cloud backups and archives require your users to upload and download files and information to and from the cloud. The CloudLanes Cloud Data Platform provides an unparalleled upload speed of upto **50 Terabytes/day per cloudlane VM** and a download speed of upto **40 Terabytes/day per cloudlane VM**—a speed rate that's unmatched by the competition.

BETTER TOTAL COST OF OWNERSHIP (TCO)

When it comes to total cost of ownership in business, ***better means cheaper***. While other vendors charge you with roughly around \$500 to \$1500 per terabyte every year, the CloudLanes Cloud Data Platform is **5 times to 10 times more cost-effective** compared with other cloud native solutions. That's almost **500% cheaper** for the same amount of storage.

NO PROCESS CHANGES

Most cloud backup and archive vendors require you to adjust to their standard. In other words, they require that you change your existing in-house processes, followed by a constant series of maintenance and updates. At CloudLanes, we offer a “**set-it and then forget-it**” solution. No need for unwieldy maintenance and updates, but only random touch-base for us to check if you're satisfied with our solution and learn how we can serve you better.

MOVE TO CLOUDLANES—NOW

The true cloud power is when you can responsibly move and store your data to and from any cloud, ignite that data from any cloud, and ensure a responsible process to it. CloudLanes and our breakthrough Cloud Data Platform is here to help you achieve it—faster, cheaper, and more seamlessly than ever before.

For more information on how we can help you with your backup and archiving needs, [send us a message](#) and we will get back to you promptly.
